

Greetings to you from the Camp Homewood Kitchen!

We are looking forward to your upcoming visit to the camp and are planning and preparing with eager anticipation.

Our goal here at the camp kitchen is to provide healthy, nutritious meals for the guests who spend time at our facility.

In response to the current realities of an ever increasing amount of individuals with special dietary concerns, we would like to define what part we can play at this point in providing for those special circumstances and guests.

Although we will make some provisions for dietary concerns (i.e. gluten free, dairy free, egg free), the options will be limited. Lunches and suppers will include vegetables, fruit, salads, and a protein. We do have gluten free breads, muffins, and cereal we can provide if necessary. **To prevent disappointment and possible hunger issues, we advise those with special dietary concerns to bring some of their own food if more is required than what we provide.** A small refrigerator, microwave, and toaster will be available for their use. If a child comes with special dietary concerns, a chaperone of the group will need to help him/her through the process if necessary. Also, although we would love to have the time to do so, we just cannot address individual meal planning meetings over the phone or via e-mail.

Thank you for your kind understanding of these matters and for passing this information on to your other group members.

We looking forward to your upcoming visit,

Food Service Manager
Camp Homewood
